investigative ophthalmology

A Journal of Clinical and Basic Research

EDITOR

Herbert E. Kaufman, M.D.

Professor of Ophthalmology and Pharmacology
College of Medicine
University of Florida
Gainesville, Florida

MANAGING EDITOR

Maija H. Uotila

University of Florida
Gainesville, Florida

EDITORIAL BOARD

DANIEL M. ALBERT
New Haven, Connecticut

J. STEVENS ANDREWS
Nashville, Tennessee

G. WINSTON BARBER
Philadelphia, Pennsylvania

DWIGHT A. BURKHARDT
Minneapolis, Minnesota

CHANDLER R. DAWSON
San Francisco, California

WILLIAM W. DAWSON
Gainesville, Florida

LYNETTE FEENEY
Portland, Oregon

SIDNEY FUTTERMAN
Seattle, Washington

MORTON GOLDBERG
Chicago, Illinois

PETER GOURAS
Bethesda, Maryland

DAN B. JONES
Houston, Texas

CARL KUPFER
Bethesda, Maryland

ALAN M. LATIES
Philadelphia, Pennsylvania

IRVING H. LEOPOLD
New York, New York

A. EDWARD MAUMENEE
Baltimore, Maryland

WILLIAM H. MILLER
New Haven, Connecticut

STEVEN M. PODOS
St. Louis, Missouri

FRANK M. POLACK
Gainesville, Florida

DAVID A. ROBINSON
Baltimore, Maryland

MELVIN L. RUBIN
Gainesville, Florida

ALAN B. SCOTT
San Francisco, California

MARVIN L. SEARS
New Haven, Connecticut

GERALD WESTHEIMER
Berkeley, California

Subject index*

A

A and B forms of monoamine oxidase in iris–ciliary body, superior cervical ganglion, and pineal gland of albino rabbits, 529

Abducens palsy, phasic and tonic components in saccadic eye movements in, 657

Acetazolamide, effect on rates of movement of sodium, chloride, and bicarbonate from plasma to posterior chamber, 356

and isoproterenol, effects on aqueous humor dynamics in young and old normal volunteers, 349

test and weight tonography in pathological and apathological circulation of aqueous humor, 844

Acquired color defect of opponent-color system, 584

Actin filaments in apical projections of primate pigmented epithelial cell, 570

Adenine arabinoside monophosphate, anti-herpes activity, 196

Adenosine arabinoside (Ara-A), teratogenicity of, 556

Adenovirus antigen in epidemic keratoconjunctivitis, immunofluorescent detection of, 199

Adrenergic antagonists, interaction of, with prostaglandin E_2 and tetrahydrocannabinol in eye, 102

innervation of rat corneal epithelium, 147

receptors of human intraocular muscles, 502

sensitivity of rabbit iris, alterations in, after variation of environmental lighting conditions, 44

Age and hyperoxia, effect on components of vitreous-soluble proteins, 228

Agitation, mechanical, effects on endothelial function of preserved cornea, 774

Allografts, rabbit corneal, immunologic protection of: prolonged survival of allografts pretreated with homologous antibody against transplantation antigen, 213

Alpha-crystallin, human. I. Isolation and characterization of newly synthesized alpha-crystallin, 288

-III, human, isolation and characterization of protein from normal infant lenses and old lens peripheries, 394

Analog vs. digital photogrammetry for optic cup analysis, 651

Analysis of metals in eye, noninvasive method for, 770

Announcements, 78, 158, 241, 328, 442, 592, 682, 788, 970, 1030

Antibody, homologous, against transplantation antigen, prolonged survival of allografts pretreated with, 213

response, ocular secondary, nonspecific stimulation of, 863

Antidromic stimulation of trigeminal nerve, contralateral effect on rabbit eye, 564

Antigen, adenovirus, in epidemic keratoconjunctivitis, immunofluorescent detection of, 199

histocompatibility, and parental history in primary open-angle glaucoma and diabetes mellitus, 954

transplantation, prolonged survival of allografts, pretreated with homologous antibody against, 213

Anti-herpes activity of adenine arabinoside monophosphate, 196

Apical projections of primate pigmented epithelial cell, actin filaments in, 570

Aqueous humor dynamics in glaucomato-cyclitic crisis, 365

in man: effects of acetazolamide and isoproterenol in young and old normal volunteers, 349

pathological and apathological circulation of, acetazolamide test and weight tonography in, 844

Ara-A; see Adenine arabinoside

Argon laser emission, effect of ocular media on main wavelengths of, 70

irradiated rabbit eyes, ocular transmittance and irradiation distribution in, 668

ARVO financial statement, 329

Ascorbic acid preventing corneal ulceration and perforation after experimental alkali burns, 986

Aspirin and indomethacin, effects on ocular response to circulating bacterial endotoxin in rabbit, 648

Atropine, long duration of mydriatic effect, 671

Axonal transport, dynamics and location of blockade by acute intraocular pressure elevation in optic nerve, 606

Axoplasmic transport, slow, and histology within optic nerve of rhesus monkey, effect of interruption of short posterior ciliary arteries on, 495

B

Beef cornea, gluconeogenic pathway for corneal glycogen synthesis in, 542

*January, pp. 1-78; February, pp. 79-162; March, pp. 163-242; April, pp. 243-332; May, pp. 333-442; June, pp. 443-512; July, pp. 513-592; August, pp. 593-682; September, pp. 683-788; October, pp. 789-876; November, pp. 877-970; December, pp. 971-1052.

Beta-crystallin from primate lens, 673
Bicarbonate, rates of movement from plasma to posterior chamber: effect of acetazolamide and relation to treatment of glaucoma, 356
Bilirubin, presence in ocular humors of premature infants, 509
4-Biphenylacetic acid inhibiting prostaglandin- mediated ocular responses, 1005
Blood-aqueous barrier, disruption of, effect of imidazole on, in rabbit eye, 315
effect of paracentesis on, in cynomolgus monkey, 824
Bovine cornea, distribution of hexosamines in, 301
pigment epithelium, normal interaction with plasma retinol-binding protein from retinitis pigmentosa, 1020
Bruch's membrane and vascular growth, 443
Burns, alkali, experimental, ascorbic acid preventing corneal ulceration and perforation after, 986

C

^{14}C-antipyrine for estimation of rhesus monkey blood flow, 740
^{14}C-palmitic acid, metabolism by lens, 427
Calcium-induced spikes in cultured pigment epithelium of chick retina, 62
in tears, lacrimal gland fluid, and fluid from other orbital glands, 994
Cannabis and eye function, 243
Capsule, human lens, and zonular attachments, surface ultrastructure of, 36
Casein, retinal degeneration in cats fed. I. Taurine deficiency, 47; II. Supplementation with methionine, cysteine, or taurine, 52
Cat(s), choline acetyltransferase in ocular tissues of, 808
fed casein, retinal degeneration in. I. Taurine deficiency, 47; II. Supplementation with methionine, cysteine, or taurine, 52
Cats—Cont'd
Manx, hereditary corneal dystrophy in, 4
retina, neural responses in rod and cone systems of, 946
rod and cone pathways in, 935
Cataract, experimental studies on, 685
human senile, sphingomyelin species stored in, 966
"hypoglycemic," formation of, in rat lens, role of hexokinase instability, 519
senile, different types, thickness of human lens cortex in, 425
Catechol-O-methyl transferase inhibitor, potentiation of effects of topical epinephrine on pupil and intraocular pressure by, 854
Catfish retina, neuronal circuitry in, 926
Cation ionophores, effect on intraocular pressure, 851
organic, uptake in vitro by rabbit iris–ciliary body, renal cortex, and choroid plexus, 341
Cell transfer, passive, induction of corneal graft rejection by, 89
division, inhibition in rat lenses by prostaglandin E_1, 27
Centrioles and cilia in mesothelial cells of pericanalicular region, 499
Cervical ganglion, superior, of albino rabbits, identification of A and B forms of monoamine oxidase in, 529
Chick retina, calcium-induced spikes in cultured pigment epithelium of, 62
Chloramphenicol retention on and penetration into rabbit eye, 220
topical deposits of mucosubstances on cornea by, 211
Chloride, rates of movement from plasma to posterior chamber: effect of acetazolamide and relation to treatment of glaucoma, 356
Choline acetyltransferase in ocular tissues of rabbits, cats, cattle, and man, 808
Choroid plexus, rabbit, organic cation uptake in vitro by, 341
Cilia and centrioles in mesothelial cells of pericanalicular region, 499
Ciliary arteries, short posterior, effect of interruption of, on slow axoplasmic transport and histology within optic nerve of rhesus monkey, 495
body epithelium, sulfated glycolipids in, 575
epithelium, effect of hyperosmotic agents on, 617
muscle, disinsertion in cynomolgus monkey, residual pilocarpine effects on outflow facility after, 558
retrodisplacement of, from scleral spur in cynomolgus monkey, loss of acute pilocarpine effect on outflow facility after, 793
Circuitry, retinal (Symposium), 877
Clinical trials, 513
Clonidine, intraocular pressure response of conscious rabbits to, 815
-induced mydriasis, analysis of, 566
Coats' disease, origin of ghost cell in, 677
Color defect, acquired, of opponent-color system, 584
Computers in ophthalmology, 163
Cone and rod pathways in retina of cat, 935
Conjunctiva, ultrastructural study of, in fucosidosis, 626
Constant-pressure infusion, randomized technique of, 1010
Contralateral effect of antidromic stimulation of trigeminal nerve on rabbit eye, 564
Cornea, bovine, distribution of hexosamines in, 301
de-epithelialized and de-endothelialized, hydrostatic pressure effects on deswelling of, 546
deposits of mucosubstances on, by topical chloramphenicol, 211
of dogfish, isolated, electrical parameters of, 1002
donor, endothelial function of, effects of delayed enucleation and refrigeration on, 732
macular dystrophy of, keratocytes from, lysosomes studied by vital stains, 599

Cornea—Cont'd
postoperative, M-K and moist chamber–stored, 260
preserved, endothelial functions of, effects of mechanical agitation on, 774
rabbit, distribution and origin of myoinositol in, 437
stored in intermediate-term preservative, dextran uptake and loss, 663
Corneal and conjunctival epithelial cells, cytochemical studies on endogenous peroxidase in, 297
dystrophy, hereditary, in Manx cat, 15
endothelial changes in phacoemulsification procedure, 458
endothelium, effect of intraocular irrigating solutions on, 449
human, new insights, 2
vital staining of, new technique for, 1000
epithelial cells, rabbit, grown in vitro without serum, 666
changes during midterm storage, 82
epithelium, effects of ophthalmic drugs, vehicles, and preservatives on, 246
rat, adrenergic innervation of, 147
glycogen synthesis, evidence for gluconeogenic pathway in beef cornea, 542
graft rejection, effect of splenectomy on, 541
by passive cell transfer, induction of, 89
possible role of cytotoxic antibodies in, 481
sensitized to herpes simplex virus, immune host response to, 188
membrane water permeability as function of temperature, 304
penetration of 6-aminohexanoic acid, 857
perforation after experimental alkali burns, ascorbic acid preventing, 986
sensitivity in same and differing iris color, 861
storage in McCarey-Kaufman medium, moist chamber, or standard eye-bank conditions, comparison of, 143
striae accompanying hydrogel lens wear, etiology of, 553
Corneal—Cont'd
thickness, automatic recording of, in vitro, 550
ulceration after experimental alkali burns, ascorbic acid preventing, 986
water and electrolyte content after storage in moist chamber and MK medium, 778
wounds, experimental, sliding of epithelium in, 4
Cycloscopy and fluorescein cycloscopy, 561
Cytotoxic antibodies, possible role in corneal graft rejections, 481

D

De-epithelialized corneas, hydrostatic pressure effects on deswelling of, 546
De-endothelialized corneas, hydrostatic pressure effects on deswelling of, 546
Degeneration, retinal, in cats fed casein. I. Taurine deficiency, 47; II. Supplementation with methionine, cysteine, or taurine, 52
Deswelling of de-epithelialized and de-endothelialized corneas, hydrostatic pressure effects on, 546
Detection of metals in eye, noninvasive method for, 770
Dextran, loss and uptake, in corneas stored in intermediate-term preservative, 663
Diabetes mellitus and primary open-angle glaucoma, histocompatibility antigens and parental history in, 954
Digital photogrammetry, analog and, for optic cup analysis, 651
Disciform edema, experimental, and necrotizing keratitis in rabbit, 979
Disinsertion, ciliary muscle, in cynomolgus monkey, residual pilocarpine effects on outflow facility after, 558
surgical, loss of acute pilocarpine effect on outflow facility after, 793
Dog, rod disc turnover in, 579
Dogfish, *Squalus acanthias*, electrical parameters of isolated cornea of, 1002
Dopamine, effect on intraocular pressure and pupil of rabbit eye, 371
Duration, long, of mydriatic effect of atropine, 671
Dysplasia, retinal, canine herpes-induced, and associated ocular anomalies, 267
Dystrophic retina, protection from susceptibility to light stress, 153

E

Electrical parameters of isolated cornea of dogfish, 1002
Electrolyte content of cornea after storage in moist chamber and MK medium, 778
Endothelial damage from intraocular lens insertion, 996
function of donor corneas, effects of delayed enucleation and refrigeration on, 732
of preserved corneas, effects of mechanical agitation on, 774
Endothelium, human corneal, new insights, 2
physiological function of regenerating, 96
Endotoxin, circulating bacterial, effects of aspirin and indomethacin on, in rabbit, 648
Enucleation, delayed, effect on endothelial function of donor corneas, 732
Enzyme analysis of tears in fucosidosis, 626
Epinephrine, biphasic intraocular pressure response of rabbits to, 119
topical, potentiation of effects in sympathetically denervated rabbit eye by catechol-O-methyltransferase inhibitor, 854
Epithelial cell, pigmented, primate, actin filaments in apical projections of, 570
Epithelium, ciliary body, sulfated glycolipids in, 575
conjunctival, of rats, fine structural localization of peroxidase activity in goblet cells of, 40
cultured pigment, of chick retina, calcium-induced spikes in, 62
rat corneal, adrenergic innervation of, 147
sliding of, in experimental corneal wounds, 4

Ethambutol intoxication, experimental, histopathology of, 765

Evoked potential measurements of visual acuity development in human infants, 150

Experimental studies with *Staphylococcus aureus* in M-K media, 592

Eye-bank conditions, standard, McCarey-Kaufman medium, or moist chamber, comparison of corneal storage in, 143

surgery, stereotaxic device for, 34

F

Fatty acid, essential, deficiency, and renewal of rod outer segments in albino rat, 232

Fibroblasts, human cultured, retinol- and retinoic acid–binding proteins absent from, 1017

Fibroplasia, retrolental, current status of role of oxygen, 337

Fluorescein cycloscopy, 561

Fovea, histogenesis of, in macaque monkey, 746

Friedenwald Lecture, 700

Fucosidosis, ultrastructural study of conjunctiva and skin and enzyme analysis of tears in, 626

Functional polarization of horizontal cell dendrites in goldfish retina, 895

G

Ghost cell, origin of, in Coats' disease, 677

Glaucoma, diurnal intraocular pressure variation in, effect of pilocarpine drops on, 784

open-angle; see Open-angle glaucoma

treatment of, relation of rates of movement of sodium, chloride, and bicarbonate from plasma to posterior chamber, 356

Glaucomato-cyclitic crisis, aqueous humor dynamics in, 365

Gluconeogenic pathway in beef cornea for corneal glycogen synthesis, 542

Glutamic acid, incorporation into soluble protein as function of age, 430

Glutathione and lens epithelial function, 381

Glycogen synthesis, corneal, gluconeogenic pathway for, in beef cornea, 542

Glycosaminoglycan digestion, stromal sodium binding after, 484

Goblet cells of conjunctival epithelium of rats, fine structural localization of peroxidase activity in, 40

Goldfish retina, functional polarization of horizontal cell dendrites in, 895

Graft rejection, corneal; *see* Corneal graft rejection

H

Herpes hominis keratitis in rabbits, successful therapy by 5-iodo-5′-amino-2′5-dideoxyuridine, 470

simplex infection, ocular, recurrence in, 515

effect of trigeminal nerve and ganglion manipulation on recurrence in rabbits, 726

in rabbits, neutral red treatment of, 142

virus, immune host response to corneal grafts sensitized to, 188

Hexokinase instability, role in "hypoglycemic" cataract formation in rat lens, 519

Hexosamines, distribution in bovine cornea, 301

Histocompatibility antigens and parental history in primary open-angle glaucoma and diabetes mellitus, 954

Histogenesis of fovea in macaque monkey, 746

Histopathology of experimental ethambutol intoxication, 765

Horizontal cell dendrites, functional polarization in goldfish retina, 895

Horizontal cells, interactions between, in salamander retina, 909

Hormonal influences on photoreceptor damage, 869

Host response, immune, to corneal grafts sensitized to herpes simplex virus, 188

Hydrogel lens wear, corneal striae accompanying, 553

Hydrostatic pressure effects on deswelling of de-epithelialized and de-endothelialized corneas, 546

Hyperosmotic agents, effect on ciliary epithelium and trabecular meshwork, 617

Hyperoxia and age, effect on components of vitreous-soluble proteins, 228

Hypertension, ocular, experimentally induced, improved model in rabbit, 781

Hypocholesterolemic agent causing Niemann-Pick disease–like inclusions, 1022

I

Imidazole, effect on disruption of blood-aqueous barrier in rabbit eye, 315

Immunofluorescent detection of adenovirus antigen in epidemic keratoconjunctivitis, 199

studies on trabecular meshwork in open-angle glaucoma, 1014

Inclusions, Niemann-Pick disease–like, caused by hypocholesterolemic agent, 1022

Indomethacin and aspirin, effects on ocular response of circulating bacterial endotoxin in rabbit, 648

Infants, premature, presence of bilirubin in ocular humors of, 509

Infusion, constant-pressure, randomized technique of, 1010

Inhibitors of ocular prostaglandin synthesis, comparison of, 841

Innervation, adrenergic, of rat corneal epithelium, 147

Insulin-induced mitosis, changes preceding and accompanying, in cultured rabbit lenses, 411

Interactions between horizontal cells of salamander retina, 909

Intercellular junctions in outer plexiform layer of retina, 881

Intermediate-term preservative, corneas stored in, dextran uptake and loss, 663

Interplexiform cell, new type of retinal neuron, 916
Intracellular records of neural responses in rod and cone pathways of cat retina, 946
Intraocular drug studies, dissecting ocular tissue for, 216
lens, endothelial damage from insertion of, 996
lysozyme in experimental uveitis in rabbits, aqueous and vitreous assay, 312
muscles, human, adrenergic receptors of, 502
pressure decrease in normal volunteers after timolol ophthalmic solution, 489
effect of cation ionophores on, 851
effects of miotics on, in conscious owl monkeys, 848
effect of tears on, as measured with NCT, 139
potentiation of effects of topical epinephrine on, by catechol-O-methyl transferase inhibitor, 854
of rabbit, monkey, and man, effect of d-isoproterenol on, 113
response of rabbits, biphasic to epinephrine, 119
of conscious rabbits to clonidine, 815
variation, diurnal, in glaucoma, effect of pilocarpine drops on, 784
5-Iodo-5′amino-2′5-dideoxyuridine (AIU), successful therapy of herpes hominis keratitis in rabbits by, 470
Ionophores, cation, effect on intraocular pressure, 851
Iris–ciliary body, rabbit, organic cation uptake in vitro by, 341
albino, identification of A and B forms of monoamine oxidase in, 529
Iris color, same and differing, corneal sensitivity in, 861
innervation in rat, development of, 960
rabbit, alterations in adrenergic sensitivity after variation of environmental lighting conditions, 44
Irradiation distribution in argon laser irradiated rabbit eyes, 668
Irrigating solutions, intraocular, effect on corneal endothelium, 449
Isoproterenol and acetazolamide, effects on aqueous humor dynamics in young and old normal volunteers, 349
effect on intraocular pressure of rabbit, monkey, and man, 113
effect on regional ocular blood flows, 492

J

Junctions, intercellular, in outer plexiform layer of retina, 881

K

Keratitis, herpes hominis, in rabbits, successful therapy by 5-iodo-5′-amino-2′5-dideoxyuridine, 470
necrotizing, and experimental disciform edema in rabbit, 979
Pseudomonas, experimental, in rabbits, mucin and, 208
Keratoconjunctivitis associated with sialoacryoadenitis in rats, 538
epidemic, immunofluorescent detection of adenovirus antigen in, 199
Keratocytes, normal and in macular dystrophy of cornea, lysosomes in, studied by vital stains, 599
Keratoprosthesis, 593
Kinky hair disease, Menkes': light and electron microscopic study of eye, 128
Kinsey, V. Everett: biographical sketch, 334
contributions, 336
remarkable man, 340

L

Lacrimal gland fluid, calcium in, 994
rabbit, sialic acid in, 479
Laser, argon, emission, effect of ocular media on main wavelengths of, 70
rabbit eyes irradiated by, ocular transmittance and irradiation distributi n in, 668
near-ultraviolet, ocular damage induced by, 760
Lens capsule, human, and zonular attachments, surface ultrastructure of, 36
cortex, human, thickness in different types of senile cataract, 425
Lens—Cont'd
crystalline, fiber cell, nuclear envelope in, 433
cultured mammalian, changes preceding and accompanying insulin-induced mitosis, 411
effect in vitro of long-wave ultraviolet light on, 405
epithelial function and glutathione, 381
growth in Nakano mouse, 422
hydrogel, wearing of, accompanied by corneal striae, 553
intraocular, endothelial damage from insertion of, 996
metabolism of ^{14}C-palmitic acid, 427
normal infant, and old lens peripheries, human alpha-crystallin-III isolation and characterization of protein from, 394
primate, β-crystallin from, 673
volume, effect of tonicity on, 866
Letters to Editor, 157, 237, 592
Light, continuous, survival of some photoreceptor cells in albino rats after long-term exposure to, 64
effect on synaptic organ of rat, 407
stress, protection of dystrophic retina from susceptibility to, 153
Lighting conditions, environmental, alterations in adrenergic sensitivity of rabbit iris after variation of, 44
Loss of acute pilocarpine effect on outflow facility, 793
Lymphocyte subpopulations in sympathetic ophthalmitis and nongranulomatous uveitis, 957
Lysosomes, studied by vital stains, in normal keratocytes and in macular dystrophy of cornea, 599

M

Macular circulation, development of, 835
Man, choline acetyltransferase in ocular tissues of, 808
intraocular pressure, effect of d-isoproterenol, 113
Manipulation of trigeminal nerve and ganglion, effect on recurrence of ocular herpes simplex in rabbits, 726

McCarey-Kaufman medium, moist chamber, or standard eye-bank conditions, comparison of corneal storage in, 143
Mechanical agitation, effects on endothelial function of preserved cornea, 774
Membrane damage by free radicals, oxygen toxicity and, 789
Menkes' kinky hair disease: light and electron microscopic study of eye, 128
Mesothelial cells of pericanalicular region, centrioles and cilia in, 499
Metabolism, steroid, in ocular tissues of rabbit, 222
Metals in eye, noninvasive method for detection and analysis of, 770
Microscope, specular, clinical, some optical principles of, 29
Midterm storage, corneal epithelial changes during, 82
Mitosis, insulin-induced, changes preceding and accompanying, in cultured rabbit lenses, 411
Miotics, effect on intraocular pressure of conscious owl monkeys, 848
MK medium, corneal water and electrolyte content after storage in, 778
  experimental studies with *S. aureus* in, 32, 592
Moist chamber, corneal water and electrolyte content after storage in, 778
  McCarey-Kaufman medium, or standard eye-bank conditions, comparison of corneal storage in, 143
Monkey, cynomolgus, effect of paracentesis on blood-aqueous barrier in, 824
  loss of acute pilocarpine effect on outflow facility, 793
  residual pilocarpine effects on outflow facility after ciliary muscle disinsertion in, 558
  intraocular pressure, effect of d-isoproterenol, 113
  macaque, histogenesis of fovea in, 746
  owl, conscious, effects of miotics on intraocular pressure in, 848
Monkey—Cont'd
  rhesus, ^{14}C-antipyrine for estimating blood flow in, 740
  histology within optic nerve of, effect of interruption of short posterior ciliary arteries on slow exoplasmic transport and, 495
Monoamine oxidase, A and B forms, identification in iris–ciliary body, superior cervical ganglion, and pineal gland of albino rabbits, 529
Mouse, morphological fiber types of retractor bulbi muscle in, 654
  Nakano, lens growth in, 422
Mucin and experimental *Pseudomonas* keratitis in rabbits, 208
Mucosubstances, deposits on cornea by topical chloramphenicol, 211
Muscle fiber, morphological types, of retractor bulbi in mouse and rat, 654
Mydriasis, clonidine-induced, analysis of, 566
Mydriatic effect of atropine, long duration of, 671
Myoinositol in rabbit cornea distribution and origin, 437

N

NCT, effect of tears on intraocular pressure as measured with, 139
Near-ultraviolet laser radiation, ocular damage induced by, 760
Necrotizing keratitis and experimental disciform edema in rabbit, 979
Nerve, trigeminal, contralateral effect of antidromic stimulation of, on rabbit eye, 564
Neural responses in rod and cone systems of cat retina, 946
Neuron, retinal, interplexiform cell as new type of, 916
Neuronal circuitry in catfish retina, 926
Niemann-Pick disease–like inclusions caused by hypocholesterolemic agent, 1022
Nitrogen mustard, topical, pathways of eye's response to, 486
Noninvasive method for detection and analysis of metals in eye, 770
Nonspecific stimulation of secondary ocular antibody response, 863
Norepinephrine, effect on regional ocular blood flows, 492
Nuclear envelope in crystalline lens fiber cell, 433

O

Ocular antibody response, secondary, nonspecific stimulation of, 863
  damage from near-ultraviolet laser radiation, 760
  humors of premature infants, presence of bilirubin in, 509
  hypertension in rabbit, experimentally induced, improved model of, 781
  inflammatory responses, prostaglandin-mediated, inhibited by 4-biphenylacetic acid, 1005
  inserts, pilocarpine, 1008
  irritation, experimental, objective evaluation of, 308
  media, effect on main wavelengths of argon laser emission, 70
  prostaglandin synthesis inhibitors, comparison of, 841
  tissue, dissecting, for intraocular drug studies, 216
  of rabbit, steroid metabolism in, 222
  transmittance in argon laser irradiated rabbit eyes, 668
Open-angle glaucoma, primary, differential sensitivity at cellular level in: prednisolone and ouabain, 403
  and diabetes mellitus, histocompatibility antigens and parental history in, 954
  trabecular meshwork in, immunofluorescent studies on, 1014
Ophthalmic drugs, vehicles, and preservatives, effects on corneal epithelium, 246
  pathology, comparative, 975
Ophthalmitis, sympathetic, and nongranulomatous uveitis, lymphocyte subpopulations in, 957
Ophthalmoplegia, congenital total external, associated with infantile spinal muscular atrophy: fine structure of extraocular muscle, 320

Opponent-color system, acquired color defect of, 584
Opsin, rat, photosensitive pigments formed with, 872
Optic cup analysis, analog vs. digital photogrammetry for, 651
Optic nerve, acute intraocular pressure elevation in, blocking axonal transport, 606
Orbital gland fluid, calcium in, 994
Origin of ghost cell in Coats' disease, 677
Ouabain and differential sensitivity at cellular level in primary open-angle glaucoma, 403
Outflow facility and intraocular pressure, effects of thymoxamine hydrochloride, 400
residual effects of pilocarpine on, after ciliary muscle disinsertion in cynomolgus monkey, 558
Ovaries, hormonal influences on photoreceptor damage, 869
Oxygen, current status of role in retrolental fibroplasia, 337
toxicity and membrane damage by free radicals, 789

P

Paracentesis, effect on blood-aqueous barrier in cynomolgus monkey, 824
Pathology, comparative ophthalmic, 975
ocular, induced by suckling mouse cataract agent, 640
Pattern reversal visually evoked potentials in infants, 58
Pericanalicular region, centrioles and cilia in mesothelial cells of, 499
Peroxidase, activity, fine structural localization of, in goblet cells of conjunctival epithelium of rats, 40
endogenous, in conjunctival and corneal epithelial cells, 297
pH-dependent temperature sensitivity of rat lens phosphofructokinase, 505
Phacoemulsification procedure: corneal endothelial changes, 458
effect of intraocular irrigating solutions on corneal endothelium, 449
Phagocytosis, normal, in retinal pigment epithelium, primary retinal degeneration and, 757
Phasic and tonic components in saccadic eye movements in abducens palsy, 657
Phosphofructokinase, rat lens, pH-dependent temperature sensitivity of, 505
properties of, 279
Photogrammetry, analog vs. digital, for optic cup analysis, analysis, 651
Photoreceptor cells in albino rats, survival of some, after long-term exposure to continuous light, 64
Photosensitive pigments formed with rat opsin, 872
Phototherapy and retinal damage, 595
Pigment epithelium, bovine, normal interaction with plasma retinol-binding protein from retinitis pigmentosa, 1020
retinal, normal phagocytosis in, and primary retinal degeneration, 757
photosensitive, formed with rat opsin, 872
Pigmented epithelial cell, primate, actin filaments in apical projections of, 570
Pilocarpine delivery across isolated rabbit cornea by noncross-linked high viscosity polymer gel, 324
drops, effect on diurnal intraocular pressure variation in glaucoma, 784
effect, acute, on outflow facility, loss of, 793
ocular inserts, 1008
residual effects on outflow facility after ciliary muscle disinsertion in cynomolgus monkey, 558
Pineal gland of albino rabbits, identification of A and B forms of monoamine oxidase in, 529
Pituitary gland, hormonal influences on photoreceptor damage, 869
Plasma retinol-binding protein from retinitis pigmentosa, normal interaction with bovine pigment epithelium, 1020
Plexiform layer of retina, outer, intercellular junctions in, 881
Polarization, functional, of horizontal cell dendrites in goldfish retina, 895
Polymer gel, noncross-linked high viscosity, quantitation of pilocarpine delivery across isolated rabbit cornea by, 324
Potentials, visually evoked, in infants, pattern reversal, 58
Potentiation of effects of topical epinephrine on pupil and intraocular pressure in sympathetically denervated rabbit eye by catechol-O-methyl transferase inhibitor, 854
Prednisolone and differential sensitivity at cellular level in primary open-angle glaucoma, 403
Premature infants, presence of bilirubin in ocular humors of, 509
Presentation of Friedenwald Award, 698
Presentation of Proctor Medal, 169, 683
Primary open-angle glaucoma and diabetes mellitus, histocompatibility antigens and parental history in, 954
differential sensitivity at cellular level in: prednisolone and ouabain, 403
retinal degeneration and normal phagocytosis in retinal pigment epithelium, 757
Primate lens, β-crystallin from, 673
pigmented epithelial cell, actin filaments in apical projections of, 570
Procion stain showing neural responses in rod and cone system in cat retina, 946
Proctor Lecture, 171, 685
Prostaglandin E_1, inhibition of cell division in rat lenses by, 27
E_2 and tetrahydrocannabinol in eye, interaction of adrenergic antagonists with, 102
-mediated ocular inflammatory responses, inhibited by 4-biphenylacetic acid, 1005
synthesis, ocular, comparison of inhibitors of, 841
Protein from normal infant lenses and old lens peripheries, 394

Protein—Cont'd
components of vitreous-soluble, effect of hyperoxia and age, 228
soluble, incorporation of glutamic acid into, as function of age, 430
Pseudomonas keratitis, experimental, in rabbits, role of mucin, 208
Pupil, potentiation of effects of topical epinephrine by catechol-O-methyl transferase inhibitor, 854

R

Rabbits, albino, identification of A and B forms of monoamine oxidase in iris–ciliary body, superior cervical ganglion, and pineal gland of, 529
biphasic intraocular pressure response to epinephrine, 119
choline acetyltransferase in ocular tissues of, 808
conscious, intraocular pressure response to clonidine, 815
cornea, distribution and origin of myoinositol in, 437
isolated, quantitation of pilocarpine delivery across, by noncross-linked high viscosity polymer gel, 324
corneal allografts, immunologic protection of: prolonged survival of allografts pretreated with homologous antibody against transplantation antigen, 213
epithelial cells grown in vitro without serum, 666
effects of aspirin and indomethacin on circulating bacterial endotoxin in, 648
experimental disciform edema and necrotizing keratitis in, 979
experimentally induced ocular hypertension in, improved model of, 781
eyes, argon laser irradiated, ocular transmittance and irradiation distribution in, 668
chloramphenicol retention on and penetration into, 220
contralateral effect of antidromic stimulation of trigeminal nerve on, 564
effect of dopamine on intraocular pressure and pupil, 371
Rabbits, eyes—Cont'd
effect of imidazole on disruption of blood-aqueous barrier in, 315
intraocular lysozyme in experimental uveitis in, aqueous and vitreous assay, 312
pressure, effect of d-isoproterenol, 113
iris, alterations in adrenergic sensitivity after variation of environmental lighting conditions, 44
–ciliary body, renal cortex, and choroid plexus, organic cation uptake in vitro by, 341
keratitis in, *Pseudomonas*, mucin and, 208
lacrimal gland fluid, sialic acid in, 479
neutral red treatment of herpes simplex in, 142
ocular herpes simplex in, effect of trigeminal nerve and ganglion manipulation on recurrence of, 726
steroid metabolism in ocular tissues of, 222
Radicals, free, membrane damage by, oxygen toxicity and, 789
Randomized technique of constant-pressure infusion, 1010
Rat, albino, essential fatty acid deficiency and renewal of rod outer segments in, 232
survival of some photoreceptor cells in, after long-term exposure to continuous light, 64
corneal epithelium, adrenergic innervation of, 147
development of iris innervation in, 960
fine structural localization of peroxidase activity in goblet cells of conjunctival epithelium of, 40
keratoconjunctivitis associated with sialoacryoadenitis in, 538
lenses, cell division in, inhibition by prostaglandin E_1, 27
"hypoglycemic" cataract formation in, role of hexokinase instability, 519
phosphofructokinse, pH-dependent temperature sensitivity of, 505
Rat—Cont'd
morphological fiber types of retractor bulbi muscle in, 654
opsin, photosensitive pigments formed with, 872
synaptic organ of, light effect on, 407
Receptors, adrenergic, of human intraocular muscles, 502
Recurrence in ocular herpes simplex infection, 515
Refrigeration, effect on endothelial function of donor corneas, 732
Renal cortex, rabbit, organic cation uptake in vitro by, 341
Reptilian spectacle, vascularity in, 587
Residual pilocarpine effects on outflow facility after ciliary muscle disinsertion in cynomolgus monkey, 558
Retina, cat, neural responses in rod and cone systems of, 946
rod and cone pathways in, 935
catfish, neuronal circuitry in, 926
chick, calcium-induced spikes in cultured pigment epithelium of, 62
dystrophic, protection from susceptibility to light stress, 153
goldfish, functional polarization of horizontal cell dendrites in, 895
human, retinol- and retinoic acid–binding proteins present in, 1017
outer plexiform layer of, intercellular junctions in, 881
salamander, interactions between horizontal cells in, 909
Retinal cell function, electrophysiological studies, 171
circuitry (Symposium), 877
damage, phototherapy and, 595
degeneration in cats fed casein. I. Taurine deficiency, 47; II. Supplementation with methionine, cysteine, or taurine, 52
primary, and normal phagocytosis in retinal pigment epithelium, 757
dysplasia, canine herpes–induced, and associated ocular anomalies, 267
neuron, interplexiform cell as new type of, 916

Retinal—Cont'd
pigment epithelium, normal phagocytosis in, and primary retinal degeneration, 757
Retinitis pigmentosa, plasma retinol-binding protein from, normal interaction with bovine pigment epithelium, 1020
Retinol- and retinoic acid–binding proteins present in human retina and absent from human cultured fibroblasts, 1017
Retractor bulbi muscle, morphological types in mouse and rat, 654
Retrodisplacement of ciliary muscle from scleral spur in cynomolgus monkey, loss of acute pilocarpine effect on outflow facility after, 793
Retrolental fibroplasia, current status of role of oxygen, 337
Rod disc turnover in dog, 579
and cone pathways in retina of cat, 935
outer segments in albino rat, essential fatty acid deficiency and, 232

S

Saccadic eye movements, phasic and tonic components of, in abducens palsy, 657
Salamander retina, interactions between horizontal cells of, 909
Senile cataract, human, sphingomyelin species stored in, 966
Sialic acid in rabbit lacrimal gland fluid, 479
Sialoacryoadenitis associated with keratoconjunctivitis in rats, 538
Skin, ultrastructural study of, in fucosidosis, 626
Sodium binding, stromal, after glycosaminoglycan digestion, 484
chloride, and bicarbonate, rates of movement from plasma to posterior chamber: effect of acetazolamide and relation to treatment of glaucoma, 356
Spectacle, reptilian, vascularity in, 587
Specular microscope, clinical, some optical principles of, 29
Sphingomyelin species stored in human senile cataract, 966
Splenectomy, effect on corneal graft rejection, 541
Squalus acanthias, electrical parameters of isolated cornea of, 1002
Staphylococcus aureus, experimental studies with, in M-K media, 32, 592
Stereotaxic device for experimental eye surgery, 34
Steroid metabolism in ocular tissues of rabbit, 222
Strabismic suppression, site of, 660
Striae, corneal, accompanying hydrogel lens wear, etiology of, 553
Stromal sodium binding after glycosaminoglycan digestion, 484
Suckling mouse cataract agent, ocular pathology induced by, 640
Sulfated glycolipids in ciliary body epithelium, 575
Suppression, strabismic, site of, 660
Surgical disinsertion, loss of acute pilocarpine effect on outflow facility after, 793
Synaptic organ of rat, light effect on, 407

T

Tears, calcium in, 994
effect on intraocular pressure as measured with NCT, 139
enzyme analysis of, in fucosidosis, 626
Temperature, corneal membrane water permeability as function of, 304
sensitivity, pH-dependent, of rat lens phosphofructokinase, 505
Teratogenicity of adenine arabinoside, 556
Tetrahydrocannabinol, interaction of adrenergic antagonists with prostaglandin E_2 in eye, 102
Thymidine, novel analog of: 5-iodo-5′-amino-2′5-dideoxyuridine, successful therapy of herpes hominis keratitis in rabbits by, 470
Thymoxamine hydrochloride, effects on facility of outflow and intraocular pressure, 400
Timolol ophthalmic solution, intraocular pressure decrease in normal volunteers after, 489
Toxicity, effect on lens volume, 866
Trabecular meshwork, effect of hyperosmotic agents on, 617
in open-angle glaucoma, immunofluorescent studies on, 1014
Trigeminal nerve, contralateral effect of antidromic stimulation of, on rabbit eye, 564
and ganglion, manipulation of, effect on recurrence of ocular herpes simplex in rabbits, 726

U

Ultraviolet light, long-wave, effect on lens, model systems for detecting and measuring in vitro, 405
Uveitis, experimental, in rabbits, intraocular lysozyme in, aqueous and vitreous assay, 312
nongranulomatous, and sympathetic ophthalmitis, lymphocyte subpopulations in, 957
what's new in, 79

V

Vascular growth and Bruch's membrane, 443
Vascularity in reptilian spectacle, 587
Visual acuity development in human infants, evoked potential measurements, 150
cells and concept of renewal, 700
Visually evoked potentials in infants, pattern reversal, 58
Vital staining of corneal endothelium, new technique for, 1000
stains for studying lysosomes in normal keratocytes and in macular dystrophy of cornea, 599
Vitreous, surgical approach to, 447
von Sallmann, Ludwig J. K., M.D., 1892-1975 (in memoriam), 1

W

Weight tonography compared with acetazolamide test in pathological and apathological circulation of aqueous humor, 844

X

Xerophthalmia, characteristics of children with, and prevention, 417

Z

Zonular attachments, surface ultrastructure of human lens capsule and, 36
